PROFESSIONAL SUMMARY

I'm Nehemiah Kibet, a dynamic **Mechatronics & Software Engineer** with expertise in IoT systems, processes automation, and full-stack development. I combine technical proficiency in PLCs, cybersecurity and full stack software development with hands-on experience in automotive engineering, software development and projects & facilities management. Proven leader with a track record of academic excellence and a passion for innovation.

From my experience at NCBA Bank Kenya, I worked hands-on in process automation, facilities technology, and cross-functional project delivery, giving me a ground-level understanding of how banking systems and customer journeys actually work. I can speak both the language of technology teams and the language of business outcomes.

WORK EXPERIENCE

Automotive Engineering Intern | Porsche Center Nairobi

Nairobi, Kenya

Jan 2022 - Apr 2022

- Performed diagnostics and repairs on luxury vehicles, achieving a 95% client satisfaction rate.
- Assisted in training of technicians on advanced automotive systems and troubleshooting protocols.

Nyeri, Kenya

Jan 2023 - May 2023

- Developed and deployed scalable web applications for university projects, improving workflow efficiency by 30%.
- Collaborated with cross-functional teams to integrate IoT solutions for campus automation.

Commercial Services | NCBA Bank Kenya

Nairobi, Kenya

Apr 2025 - Feb 2026

- Automation of NCBA processes, facilities and equipment
- Sustainability Analyst
- Facilities & Projects Management
- Projects coordination and supervision.

EDUCATION

Dedan Kimathi University of Technology

BSc in Mechatronics Engineering

Nyeri, Kenya

May 2019 - Apr 2024

ALX Africa

Software Engineering

Nairobi, Kenya

Apr 2023 - Jun 2024

Zalego Academy

Diploma in Computer Programming

Nairobi, Kenya

Jan 2019 - Apr 2019

Kapsabet Boys' High School

Kenya Certificate of Secondary Education (KCSE)

Nyeri, Kenya

Feb 2015 - Nov 2018

SKILLS AND ACHIEVEMENTS

Full-stack developer of applications, IoT systems using C/C++, Python, node-red, JavaScript,
Computer hardware & software technician,
Automation of data & processes using n8n,
A.I agentic automation and prompt engineering,
Unix systems operations and troubleshooting,
Ethical hacking & vulnerability assessments on software applications
Automotive diagnostics, repair and servicing,
Facilities and Projects Management,
DevOps using various systems like Git, Docker & Kubernetes.

PROJECT EXPERIENCE

IoT-Based, Digital Twinned Smart Elevator System |

Automotive Diagnostic Tool | Porsche Centre, Nairobi

Web Applications | Full-stack applications

Facilities Management | Repair & Maintenance

Projects Management | Projects initiation and completions

Automation of Processes | Smart event attendance
